ASTER **PRINCESS LINDA**

BODGER 1949

Linda brings an important new florist's color into the already popular Princess type. It is pure, clear rose, a color long desired by florist growers who have had outstanding success with Princesses Bonnie, Marsha and Anne. The Princesses are practically ideal cutflower types: They have an attractive appearance, good colors, ship well, make satisfactory stems and bloom prolifically. They make fine home garden bedding and cutting plants, too, where Asters can be successfully grown. Flowers have deep crested centers with multiple rows of guard petals. Plants are branching, 2'-2 1/2' high. Linda, like all the Princesses, was bred in our famed Wilt Workshop and is therefore highly wilt-resistant.

Autumn Delivery: \$15.00/Lb.

NICKELTYPES OF THIS COLOR PICTURE (#3019F):
\$21.50/SET

COSMOS **RADIANCE**

ALL-AMERICA SELECTIONS

BODGER 1948

This Bodger introduction for the 1948 season has proved immensely popular with home gardeners because it will grow well almost anywhere, and repays a minimum of care with a profusion of large, long stemmed flowers well suited for cutting. A cross between the Sensation type and a zoned hybrid developed by Sydney Percy-Lancaster of Calcutta, India, it took twelve years to perfect in Bodger trial grounds, and won the top All America Award for the year 1948. Radiance is a *real* novelty—the central crimson zone is entirely new in Cosmos and identifies it like a signature. Your customers can see the difference at a glance. Women appreciate its brilliance under artificial light!

Immediate or Autumn Delivery: \$10.00/Lb.

NICKELTYPES OF THIS COLOR PICTURE (#3015F):
\$21.50/SET

CALENDULA **SUNSET SHADES**

BODGER 1949

Novel petal colorings characterize this new Bodger introduction, and recommend it especially for the home gardener who wants something new in his garden color scheme. Base color of the flowers is apricot, overlaid with rich tipping and striping of orange, lemon, primrose and in-between shades. The two-tone effect is very pronounced, varying from flower to flower and color to color. Flower form is rounded rather than flat, with petals of good substance but not stiff as those of Campfire. Blooms are medium sized, neat and compact, 3" in diameter. Plants are quite compact, making strong stems of medium length. This strain is ideally suited for low bedding where cut flowers for the house are wanted as well.

Autumn Delivery: \$3.00/Lb.

ELECTRO OF THIS PICTURE (#1139F): \$2.75

LARKSPUR **REGAL ROSE**

(NOT ILLUSTRATED)

After more than ten years of development, we are proud to announce a brand new type of florist's Larkspur—our Regal Strain. Greatly superior to our popular Kings, the Regals retain the height and compact basal branching habit of the Giant Imperials, but feature a tremendously long spike of well-spaced florets as huge

as those of Delphinium. Plants are extremely vigorous and quite early. Regal Rose, a rich florist's rose color, is the first of the new type, and will be available from 1948 crop. Try this champion Larkspur right away!

Autumn Delivery: \$15.00/Lb.

LARKSPUR **CARMINE KING IMPR.**

BODGER 1948

This new Larkspur in the Giant Imperial class was developed in response to specific requests from florist's suppliers for a carmine which would not show streaking in the petals under normal growing conditions. Carmine King Improved is a very definite improvement in this direction, and petal streaking is held to a minimum. In addition, it has a longer spike, sturdier growth, and larger florets than any of the Giant Imperials to date. Color is a little deeper than Carmine King, and it will hold under very trying conditions. We recommend this Larkspur to florists as a replacement for Carmine King.

Autumn Delivery: \$4.00/Lb.

ELECTRO OF THIS PICTURE (#1132F): \$2.75

FUCHSIA

BODGER'S SUPER-LATIVE MIXTURE

Nurserymen and market gardeners as well as amateurs can produce flowering Fuchsia plants from seed in no more time than needed for most perennials, and at a fraction of the cost of using cuttings. They are a profitable crop, and *temperature requirements are not critical*. Our seed is from intercross-pollinated plants, and unlike that from selfed Fuchsias, has strong vitality and will produce hybrid as well as parent types. In our Superlative Mixture we offer for the first time seed from hand crosses between plants having American Fuchsia Society "A" or "B" ratings only—the cream of the crop. Varieties used are listed at right, and new award winners are being added continually.

**Summer and Autumn Delivery—Per 1000
Seeds: \$6.00; Per ¼ Oz.: \$80.00**

SCABIOSA

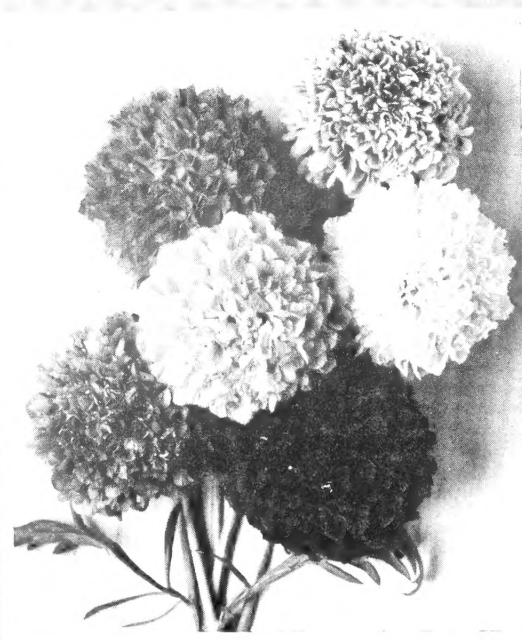

IMPERIAL HYBRIDS

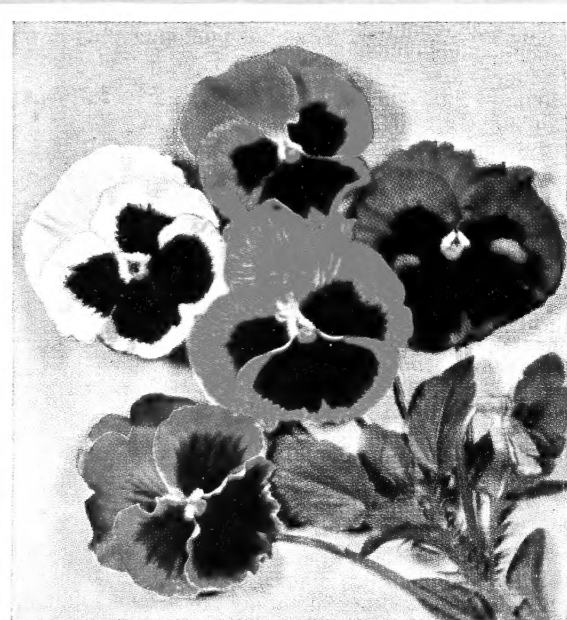

BODGER 1947

Here is a strain of annual Scabiosa so much different, so much better than the old pincushion type that it comprises an entirely new class—the Imperial Giant, or ball-shaped type. A few years back we introduced the first of this type — Blue Moon — and it was hailed as an outstanding achievement; now we have developed the Hybrids in a full range of brilliant colors. Flowers are extremely large, and composed entirely of broad, frilled petals arranged in a compact ball (no pincushion!). Plants are upright, 42"-48" tall, bearing flowers on long wiry stems. Compare, and you'll agree — the Imperial Hybrids are a new race of Scabiosa.

Immediate or Autumn Delivery: \$4.00/Lb.

ELECTRO OF THIS PICTURE (#1127F): \$2.75

PANSY SWISS GIANTS

This fine strain has long been the standard for home garden use, as it yields large, well-marked flowers of excellent form and substance in a wide color range which includes the rarer reds and blues. We grow our seed in cool weather locations to assure you good plump seed of satisfactory vitality.

Immediate or Autumn Delivery: \$55.00/Lb.

NICKELTYPES OF THIS COLOR PICTURE (#3022F):
\$21.50/SET

DELPHINIUM PACIFIC GIANTS

This remarkable strain was developed by Vetterle and Reinelt of California. Spikes are huge, with 2 1/2"-3 1/2" florets well spaced on strong stems, fully double. Seed we offer is grown from originator's hybrid stock.

Summer and Autumn Delivery: \$5.00/Oz.

NICKELTYPES OF THIS COLOR PICTURE (#3012F):
\$21.50/SET

CHRYSANTHEMUM MERRY MIXTURE

A comparatively recent introduction, Merry Mixture is so superior to previously used strains of Painted Daisies that it makes them obsolete. It includes new solid colors not found in the old Tricolor, as well as a better range of zoned or tricolored flowers. Plants are 2 1/2'-3' high, bushy but upright, bearing the flowers near the top. Painted Daisies are annuals requiring very little attention, and the flowers are good for cutting. Priced the same as Tricolor.

Immediate or Autumn Delivery: \$3.00/Lb.

NICKELTYPES OF THIS COLOR PICTURE (#3014F):
\$21.50/SET

ASTER BALLET QUEEN

Our 1948 introduction in the Queen of the Market class. Deep salmon rose, exceptionally double and extremely wilt-resistant.

Immediate or Autumn Delivery: \$8.00/Lb.

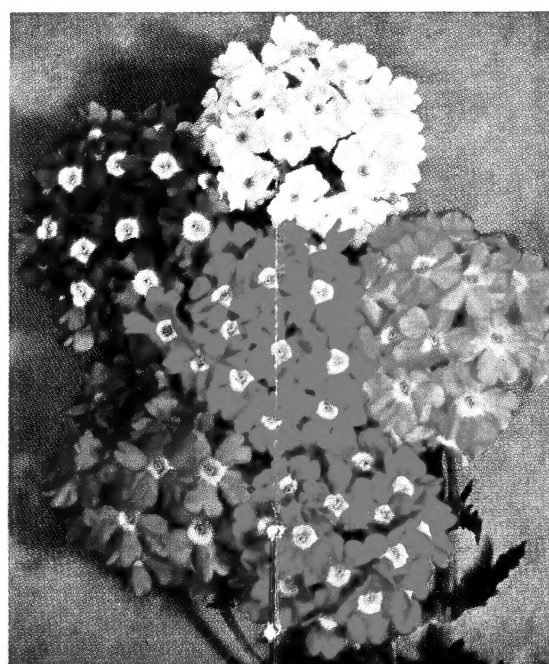

NICKELTYPES OF THIS COLOR PICTURE (#3017E):
\$18.50/SET

VERBENA GIGANTEA MIXED

Our own well-balanced mixture of giant flowers for low bedding. Brilliant colors.

Immediate or Autumn Delivery: \$10.00/Lb.

NICKELTYPES OF THIS COLOR PICTURE (#3018F):
\$21.50/SET

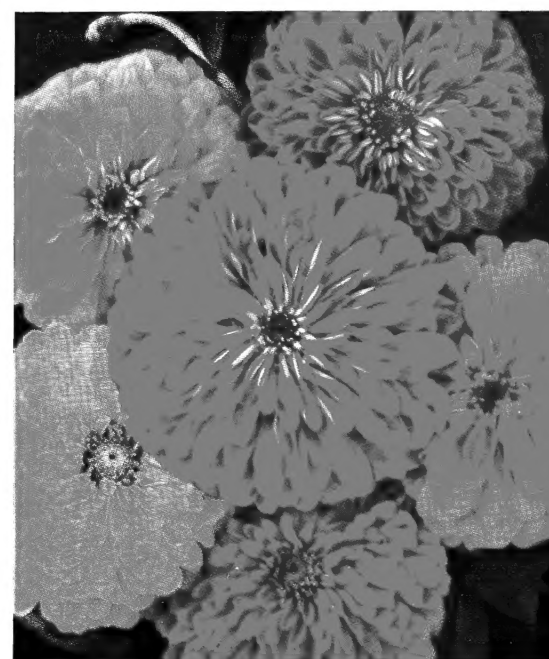

PETUNIA RAMONA STRAIN

The word "Ramona" describes exclusively our famous dwarf strain of Giants of California, bred especially for florist's pot plant use. The flowers are truly huge, measuring 5"-6" across, evenly and attractively ruffled, and of colors unsurpassed in Petunias. This is the finest dwarf strain offered, regardless of price.

Immediate or Autumn Delivery

Dark or Light Shades, or Both: \$30.00/Oz.

NICKELTYPES OF THIS COLOR PICTURE (#3023F):
\$21.50/SET

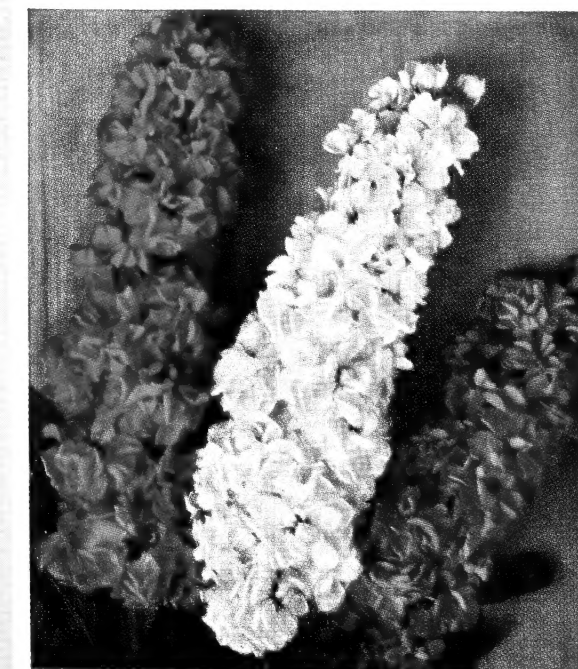

ZINNIA DAHLIA FLOWERED

Bodger's Gold Medal Dahlia Flowered Zinnias are a superlative strain, widely grown and often imitated; by public acclaim the most popular ever introduced. The seed we offer today is unreservedly the finest in the market, guaranteed by the words: "Originator's seed."

Immediate or Autumn Delivery

Gold Medal Mixed: \$3.50/Lb. Colors: \$4.00/Lb.

NICKELTYPES OF THIS COLOR PICTURE (#3020F):
\$21.50/SET

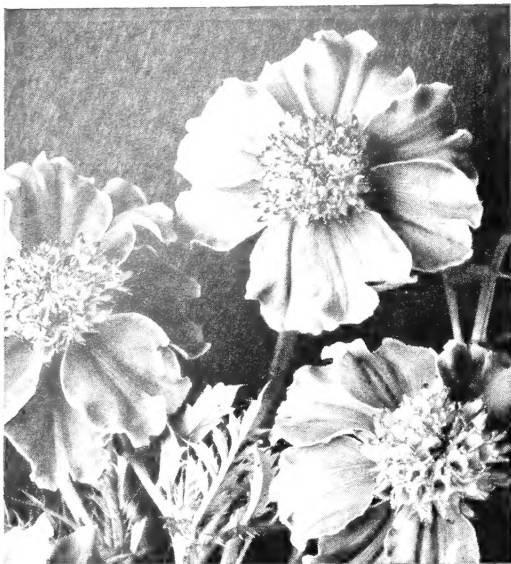

STOCK DOUBLE GIANT COLUMN

We have had long experience in growing fine Column Stocks for florist growers, and our origination, Gardenia, is now the standard outdoor white. We have the full range of varieties, including Ball numbers 1, 3, 8, 14, 16, 21, 22, 24, Gardenia, Yellow Wonder, Silvery Lilac, Royal Purple, and Illusion, all true to color and with a high percentage of doubleness. Ours are fine Stocks, backed by skilled breeding and selection. Let us prove it in our trial grounds—or yours.

Autumn Delivery—Yellow Wonder: \$80/Lb.

All other varieties: \$60.00/Lb.

NICKELTYPES OF THIS COLOR PICTURE (#3021F):
\$21.50/SET

MARIGOLD REDHEAD

ALL-AMERICA SELECTIONS

1948

The most interesting of all the recent introductions in dwarf single French Marigolds, Red Head has large crested flowers 2" across with broad, overlapping petals. Petal color is mahogany when flowers first open, changing to auburn and later to bronze. The crested center is composed of small upright petals, gold edged with maroon. Plants are dwarf and compact, 14"-16" high, spreading slightly wider and blooming very profusely. Blooms begin early and continue throughout the summer. An excellent type for low borders, and especially effective in large masses.

Autumn Delivery: \$10.00/Lb.

ELECTRO OF THIS PICTURE (#1133F): \$2.75

SWEET PEA CUTHBERTSON

(NOT ILLUSTRATED)

A new type of Sweet Pea characterized by its excellent heat resistance. Comes into bloom midway between Early and Late Spencers, and continues much longer, even in hot weather. Flowers are plainer than the Spencer type, but large and with

good stems. Results to date indicate that it is preferable to the Late Spencer where summers are hot and early. We can supply the full range of separate colors and mixed.

Immediate Delivery Certain Colors and Mixed

Autumn Delivery: Colors \$1.75/Lb.; Mixed \$1.25/Lb.

DIANTHUS TETRA HEDDENSIS

BODGER 1948

An entirely new tetraploid variety developed from a cross between D. Heddewigi and D. Chinensis. The first of the type was the 1946 All America winner, Westwood Beauty. Tetra Heddensis Mixed is the mixture of colors in the new type, and contains all the traditional Dianthus colors plus a new salmon shade. The new type combines the large, open flowers of Heddewigi with the rugged growth and long stems of Chinensis, and is more tolerant of extreme temperatures than either of the parent types. Flowers are 2" across, borne on 16" stems suitable for cutting. Much better than Heddewigi single for general use.

Immediate or Autumn Delivery: \$4.50/Lb.

ELECTRO OF THIS PICTURE (#1135F): \$2.75

ZINNIA EARLY WONDER

BODGER

Earliest of all Zinnias, Early Wonders can be grown in localities having a short summer where the other types cannot. In other latitudes they provide a show of bloom quickly—an asset in any summer annual. The Early Wonder plant habit is quite unique: 18"-24" tall, it is basal branching, producing flowers on very long stems which have no laterals and practically no leaves. For this reason it is ideal as a garden cutting flower. Flowers are medium-sized, 3"-4" across, of rounded shape and with a distinct petal form. The mixture contains bright "Spanish" colors.

Immediate or Autumn Delivery: Mixed \$6.00/Lb.

ELECTRO OF THIS PICTURE (#1134F): \$2.75

MIRABILIS PETTICOAT FOUR O'CLOCKS

BODGER 1949 (NOT ILLUSTRATED)

"Petticoat" is a perfect description of this novel Marvel of Peru: The sepals of each single flower are brightly colored to match the petals, giving a charming flower-within-a-flower effect. Otherwise, plants

are the same as regular Four o'Clocks. We are introducing here for the first time in the U.S. this origination of Mr. S. Percy-Lancaster of Calcutta. Mixed colors only.

Autumn Delivery: \$5.00/Lb.

ANTIRRHINUM TETRA SNAP

For professional cutflower and plant growers, Tetra is the most satisfactory outdoor Snapdragon offered today. Being a tetraploid, it is a vigorous grower, almost never "crippled" with rust, and these big husky plants sell quickly from flats. Blooming size plants are tall, but with finger-thick stems that keep the spikes erect and the tips straight. Florets are huge, mostly ruffled, and stay on the stem so that 12" flower spikes are usual. Colors cover the full range, with a majority of flowers richly veined. Mixed colors only, at present. An eye-opener for home gardeners who will buy a premium packet.

Autumn Delivery: \$2.55/Oz. \$30.00/Lb.

ELECTRO OF THIS PICTURE (#1131F): \$2.75

CALENDULA **CAMPFIRE**

Our introduction of Campfire as a special florist's cutting Calendula a few years back began the trend toward a large, flat flower form with strong petals for shipping. Campfire is still the best example of this type: It ships exceedingly well, and the scarlet sheen in the orange petal color makes it a good selling item on the market. With its compact habit and striking color, Campfire is also popular for home garden use both for cutting and low bedding.

Immediate or Autumn Delivery: \$4.00/Lb.

NICKELTYPES OF THIS COLOR PICTURE (#3016E):
\$18.50/SET

MARIGOLD **MIDGET HARMONY**

(NOT ILLUSTRATED)

This recent introduction (also known as Extra Dwarf Harmony) is an extremely dwarf form of the popular French Marigold Harmony, and is particularly for florist's pot plant use. Flowers are of regular Harmony form and coloring, golden

yellow bordered maroon red. Plants are of the same form and in the same class as our 1942 introduction, Butterball. Excellent for edging in the home garden.

Autumn Delivery: \$6.00/Lb.

ANTIRRHINUM **CALIF. GIANTS**

Our California Giant Mixture is perhaps the best Snapdragon for all-around use in the garden, since it is equally good for cutting and for bedding. The plants are of the popular Nanum Majestic type, eighteen to twenty-four inches in height, and of an even and compact habit. The flowers are long spikes with closely spaced, large florets, and the color range includes the full range of popular shades: Pink, rose, apricot, bronze, orange, light and deep yellow, scarlet, crimson and white. Illustrated at left are the pink, rose and deep yellow. A high percentage of the plants are rustproof, and the strain is quite sturdy outdoors.

Immediate or Autumn Delivery: \$12.00/Lb.

Quality -

People like our prompt service—and the consistent quality we have been supplying for over fifty years. Every year our guest book bulges with the names of our customers and friends who come out to see us and the unique organization we have here in El Monte. They like to see our colorful flower fields and meet the people who are responsible for the seed they get, and we like nothing better than to show them around. We'd like to have you visit us too (and incidentally, try our famous climate!), but in case you won't be able to come out our way this year, we would like you to see the way we work through the medium of the written records we make.

ZINNIA

DAHLIA FL.

Eldorado

First of all there is the growing crop in the field — judged and evaluated by production men with years of "know-how" in the flower seed business. *They know what you want—and make sure that you get it.* Stock seed must pass inspection, germination is noted, plant behavior is checked, fields are inspected throughout the flowering season for trueness to color, habit and type. Field books are crammed with notes on the crop, and when Autumn comes around the production man says what to harvest, when, and how. No harvester moves until the Master Tag is out, and not a bag nor a canvas goes anywhere without the little tag that identifies it as part of a specific lot. When you're handling more than a thousand different colors and vari-

eties of seed, no precaution is too much trouble to assure that the bag contains what the label says. Many of our visitors marvel that we can keep all these varieties apart—we use color code, special tags, endless forms and records; check and recheck to make this so.

Let's look at the cleaning mill, where the threshed seed is received and a receipt given for its safe arrival thus far. Through as many as five machines the seed goes until it is clean as a whistle—and seed in any phase of cleaning is instantly identifiable here too, with compressed air cleaning to prevent any mixing in the cleaning mill.

Now we are ready to attach a warehouse tag, containing all the Master formation and more, for samples are immediately taken and the germination recorded. The "8" in the circle, incidentally, means the crop year—in this example, 1948 crop. The first responsibility of the production man is conscientious care, but the second is speed. When you place your contract

- Quick

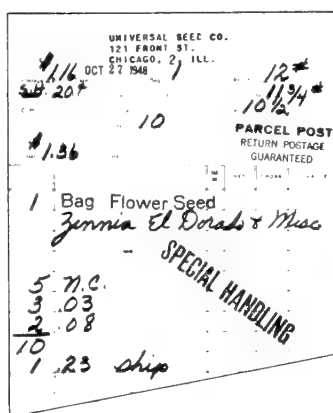

your order is always together, ready to ship according to your instructions.

Let's take a minute, however, to consider how your spot orders are handled: Perhaps on Monday you need some seed. By Airmail we are two days from anywhere in the United States, so your order is here at 8 A.M. Wednesday. That's it, in the upper left-hand corner of this page. By 10 A.M. it has been read and checked by someone who

knows your requirements well, priced, and is ready to have bag labels made. If you want a question answered, or perhaps want to get some photographs or electros that information is copied off for prompt attention elsewhere. Accompanied by bag labels, your order goes to the warehouse where it is filled, assembled, checked and sent to Shipping. Here a bag slip is made which contains all the information needed by Accounting. Your order is check-weighed, postage figured, items counted and finally put up in a shipping bag with proper label attached, to go out in the afternoon mail. If the quantity is small enough to go by Airmail you can have your seed Friday, or by Parcel Post it's in your mail Monday morning. California is as near as your airport nowadays, and our "turn-around" service on spot orders is practically jet propelled!

The only thing we can't show a picture of is the enthusiasm with which everyone here at Bodger's looks after your needs, large or small. We're really interested in seeing that you are satisfied. When you make that trip to California, come in and see us—we're glad to see you, any time. We want you to sign our guest book, and we want to show you, too, why our quality—quick! makes us new customers every year, all over the world.

PANORAMA FIELD VIEW OF BODGER'S FAMOUS WILT WORKSHOP, WHERE RESISTANCE TO FUSARIUM WILT IS BRED INTO ASTERS TO

LARGE FLOWERED, HEAVY STEMMED, SPECIAL FLORIST VARIETIES

EARLY GIANT WILT RESISTANT f (Bodger)

The finest large flowered, heavy stemmed wilt-resistant Aster yet developed. Flowers are Giants of California type, plants 1 1/2' with strong heavy stems. Will bloom in early to mid-August, four to six weeks earlier than Giants of California. An exceptional new class.

nias

sponsible for the introduction of many other popular Zinnia types. Zinnias are remarkably easy to grow, being ideal for the warm weather months in most localities. The wide range of types afford an opportunity for many uses, and flowers can be had from seed in less than sixty days. Today, Bodger grows hundreds of acres of Zinnias, not as a sideline, but as the biggest single crop of one of the world's largest flower seed growers.

SEMI-TALL, MEDIUM FLOWERED TYPE—Continued

HARMONY TYPE (Scabious Flowered) f

Plants 2½'-3', bearing numerous medium sized flowers, remarkably resembling the annual Scabiosa and Harmony Marigold.

1484 FINEST MIXED, bright shades..... .40 4.50

GAILLARDIA FLOWERED (Navajo Blanket Flower) f

Flowers resemble a Picta Double Gaillardia, in both form and colorings.

1598 FINEST MIXED "ALL-AMERICA" & "SELECTION" '38, fine for cutting..... .45 5.00

DWARF, MEDIUM FLOWERED TYPE

(ELEGANS PUMILA FLORE PLENO)

This garden favorite is becoming an important early cut flower. Flowers intermediate between Giants and Lilliputs. Plants 2'-2½'.

Seed we offer is from intercross-pollinated plants, all crosses hand-made between named varieties to insure accuracy of mixture as described. Unlike that from selfed Fuchsias, this seed is of strong vitality and will produce hybrid types.

Culture: Germinate in sterile soil or vermiculite, covering with 1/16" sand or peat moss, at 65° F. Treat with Semesan if soil is used. Keep moist but not wet. Transplant into sandy loam mixed with leaf mold. Feed weak liquid fertilizer.

Per 1000 seeds Per 1/4 oz. Per oz. ←

Don't Experiment - We

THE STORY OF BODGER'S

For hundreds of years horticulturists have developed the China Aster until it is one of the most colorful of the late summer annuals. About twenty years ago, however, the disease Aster Wilt became so widespread that it threatened the very existence of the Aster family. The problem was this: Wilt is caused by the fungus *Fusarium conglutinans* var. *Callistephi*, which lives in the soil. It may be spread by tools, water, seed—and it persists almost indefinitely. It may be avoided by using soil that has never grown Asters before, but this course is usually impractical. There is at present no drug or chemical which will destroy it. How, then, is Aster Wilt conquered?

The process developed by Bodger Seeds Ltd. in its pioneer work is much like vaccination in human beings: Plants are exposed to the Wilt and those

which survive supply seed for the next generation of test plants. This work is carried on in the Wilt Workshop, a twenty-acre farm staffed by Bodger experts which is devoted solely to wilt work and is purposely infected with as much wilt as possible.

The tendency to wilt-resistance can be inherited, so the plants grown from the seed produced the previous year are quite resistant—but the process does not stop there. Many successive generations are grown in the Workshop until the best lines have great resistance. By means of this technique—survival of the fittest—Bodger's original strains of wilt-resistant Asters were developed.

In all cases it is *resistance*, not *immunity*, which is developed. The tendency toward resistance is inherited, and will "breed out" if the strain is not

We Done That For You!

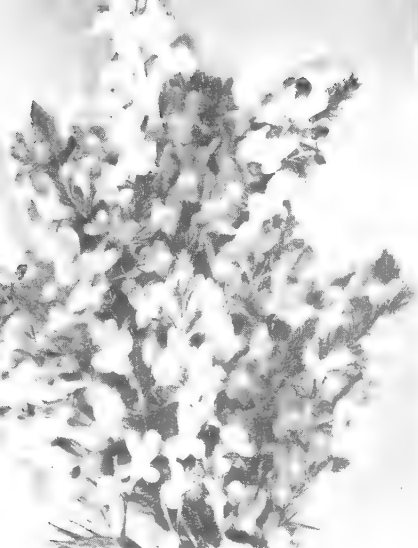

WILT-RESISTANT ASTERS

put through the Workshop cycle periodically. All Bodger Aster introductions are developed in the Workshop, and each year's stock seed comes directly from a two-generation exposure to wilt of a virulence not found in ordinary soil. Your Bodger Aster seed is highly resistant. Even a few generations of increase in non- or lightly-infected soil will produce seed of decidedly less resistance.

Resistance is hereditary, and so are plant and flower types. Bodger wilt-resistant strains are developed from non-resistant, *Commercial* varieties, quite true to type—not from crosses between commercial and inferior, though resistant, types. Because we take pride in maintaining this accuracy of type, some varieties are not offered as wilt-resistant. At present we cannot make these resistant without sacrificing

essential qualities of type, and we do not recommend their use where wilt has been observed. Combining wilt-resistance with good commercial types is not easy; since there will always be some variation. Resistance is expressed as a percentage, a high value of which is required to qualify as "wilt-resistant."

The war against wilt is a continual one, complicated by bad weather breaks which sometimes wipe out a long chain of selection work. Among commercial growers, Bodger Seeds Ltd. is the pioneer in wilt work, and the only firm actively engaged in continual research. Your Bodger wilt-resistant Aster seed is of high quality, true to type, and as wilt-resistant as we can make it. Because of this research work, wilt is no longer a problem to the careful grower who makes sure he has resistant stock.

EMPEROR WILLIAM

ELECTRO #1076G LARKSPUR
GIANT IMPERIAL

LARKSPUR REGAL STRAIN *af* (New)

Tremendously long spikes of huge, well-spaced florets distinguish this new strain of florist's market Larkspur from all others. It retains the desirable height and basal branching habit of the Giant Imperials, but has Delphinium-like florets on long, thick spikes. Vigorous and early. The finest florist's Larkspur on the market today, and these same desirable features make it perfect for home use. See page 2.

4540 REGAL ROSE, rich florist's rose..... 1.30 15.00

LARKSPUR GIANT IMPERIAL *af*

The tall, upright, compact, basal branching habit of the Giant Imperials has made them the most popular Larkspur to date for florist's and general use. The tall spikes of double flowers, carried on stems 4'-5' long, and compactly placed on upright plants, requiring only about one-half the space needed by the old stock-flowered type.

ELECTRO #1089G SWEET PEA RUFFLED SPENCER

Service Department

The Bodger Service Department was established fifteen years ago on a non-profit basis to assist our friends and customers in preparing their catalog and advertising. The scope of the department now includes almost all of the graphic arts, the most important of which is photography. Our Photographic Department has recently moved into enlarged quarters and acquired new equipment, so that it is in a position to be of more service than ever before.

PHOTOGRAPHS: We are equipped to supply, at cost price to us, professional-quality glossy prints of (1) all the varieties of which we offer seed, (2) most of the varieties we have listed in recent years, and (3) certain horticultural subjects we do not normally grow; usually in several poses of each subject. These are unexcelled for display, advertising and catalog use. The most popular of these photographs have been made into electros, and our Electro Catalog provides somewhat of a guide to what is available. When in doubt, write us of your requirements and a selection of photographs showing what we can supply will be sent by return mail. All photographs are 8" x 10", contact, printed on single weight glossy paper.....Each \$1.00

COLOR PHOTOGRAPHS: Through long experience in color work, we have found that hand-colored transparencies are the most satisfactory to discriminating users, and cost no more than existing color processes. Transparencies are regular prints on Translite film, hand colored to precision accuracy. Since they are made from our regular negatives, we can offer transparencies of any subject of which we offer black-and-white photographs. They should be displayed with a light (daylight type) behind the picture to bring out the almost life-like brilliance and beauty. They are chosen from a selection of photographs or the Electro Catalog. Transparencies are 8" x 10", contact, and are **MADE UP TO ORDER ONLY**. Allow, under normal conditions, about ten days for completion of your order. We regret that rising costs require us to raise the price to.....Each \$6.00

ELECTROS: We have available electros for use in printed matter of a great number of the photographs offered above, as well as color nickeltypes of the most popular varieties. Black-and-white: 120 screen; color: 133 screen. Electros are chosen from our Electro Catalog, from this or past Bodger seed catalogs, or from a selection of photographs, and are **MADE UP TO ORDER ONLY**. Allow, under normal conditions, about ten days for completion of your order.

ALL ELECTROS ARE SENT OUT UNMOUNTED UNLESS MOUNTING IS SPECIFICALLY REQUESTED. THERE IS AN ADDITIONAL CHARGE OF 25% FOR MOUNTING. WHEN ORDERING, PLEASE SPECIFY PREFERENCE.

F	3.50	21.50
G	3.75	27.50
H	4.00

If we do not have an electro of the size you need, you can purchase a photograph and have your printer make a cut for you. We can undertake special work, photographic or engraving, only on a cost-plus basis. The above prices go into effect immediately, superseding those effective up to date and those printed in our 1941 Electro Catalog. The 1941 Electro Catalog is still effective so far as available selection is concerned, and it may be obtained free of charge simply by writing to Bodger Seeds Ltd.

R. H. S. HORTICULTURAL COLOR CHART: In various sections of this list we have added to the regular descriptions of a variety some numbers in italics. These refer to color blocks in the Color Chart which many of our customers have secured either from us (as U.S. distributors) or the Royal Horticultural Society direct. To see the precise color of a flower so described, turn to the page indicated and mask the proper block with the black mat provided. For example, Larkspur Gt. Imp. Los Angeles Improved is described as 623/1. Turn to page 623 and mask the block 623/1, which is the first tint of the full hue 623. We are gradually completing color registrations of all listed varieties in which exact color descriptions are vital. By means of this Chart, the most complete ever compiled, exact color descriptions may be sent by letter or wire, without recourse to paints, ambiguous names or other makeshifts. Applicable to other trades and uses, also, in which color standardization is desirable. Obtainable from us, in full sets (2 volumes) only — \$12.00/set.

ELECTRO # 1082G

All seeds are quoted F.O.B. El Monte, California, terms 60 days net, less 2% cash 30 days. All invoices payable in U. S. dollars in or by New York or Los Angeles Exchange. All overdue accounts subject to sight draft without further notice.

Bags and containers will be charged at cost and are not returnable. There will be no charge made for bags smaller than the one pound size (5x7 1/2 inches).

Prices quoted in this list go into effect immediately, superseding all previous quotations. All orders of 4 ounces or over will be charged at the pound rate; all orders under 4 ounces will be charged at the ounce rate.

We reserve the right to change any or all prices in this list without notice.

In case of crop shortages, orders will be filled pro rata only.

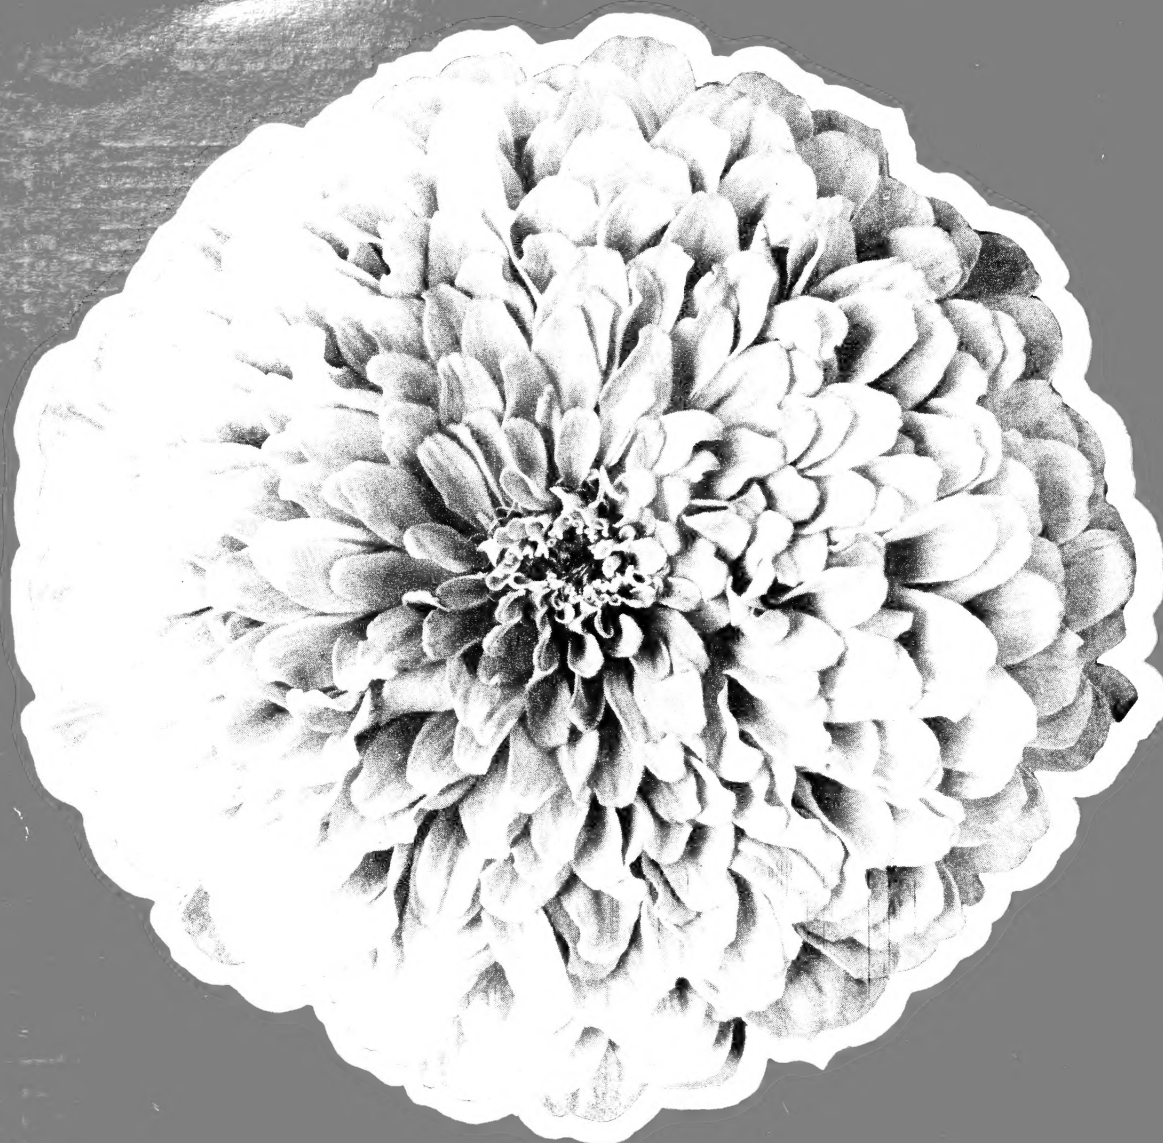

Crop failure or any cause beyond our control releases us entirely from delivery.

"We give no warranty, express or implied, as to the productiveness of any seeds or bulbs we sell and we will not be in any way responsible for the crop. Our liability, in all instances, is limited to the purchase price of the seed."

Should fulfillment of any order or contract be prevented or delayed by the act of God, war, blockade, revolution, prohibition of exports or imports, riots, strikes, lockouts, fire, loss and/or detention at sea or any other contingency beyond our control, we shall not be responsible for any loss and/or damage thereby.

Bodger's Dahlia Flowered Zinnias celebrate a silver anniversary date in 1949 — just twenty-five years ago, the Royal Horticultural Society awarded them its highest honor, the Gold Medal. The Dahlia Flowered has become the world's favorite type of the world's most popular annual and our Zinnias today keep that Gold Medal standard. Bodger's Dahlia Flowered Zinnias cost no more than those of any other reputable grower, and with every ounce you get the experience, the skill, and the traditional quality guaranteed by the words: "Originator's seed."
